

Security Data Connector Installation and activation

1. Insert your SDC card into the GSM Communicator prior to panel registration.
2. Register the panel.

Communication type configuration

Before you leave Service mode, set the control panel communication type.

For fully-fledged system use, select the type of communication **Register/Persistent (LAN)**, where registration can be performed to the cloud and services such as **MyJABLOTRON** and **MyCOMPANY** /.

For remote access to a device by F-Link SW choose **Limited GSM** or **Persistent(LAN)** if needed. communication.

When the communication type has been chosen, a connection test of all individual communicators is performed.

Register/Permanent (LAN) Limited (GSM)

Communication type configuration

Connection test

GSM OK

LAN Disabled LAN settings

Connection test was successful. At least one selected communicator is functional.
In order to register the device, select **Register**.
In order to continue configuring the control panel, select **Continue**.
